SUMMARY

B.Tech Information Technology graduate (Class of 2026) and AWS Certified Cloud Practitioner with a strong foundation in Python, SQL, OOP, and data structures. Builds REST APIs with Flask, designs relational database schemas, and writes tested, maintainable code. Academic projects span backend web development and applied machine learning.

TECHNICAL SKILLS

Languages	Python, SQL, JavaScript
Computer Science	Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
Backend	Flask, Django, REST API development, authentication, input validation, error handling
Frontend	HTML5, CSS3, Bootstrap, responsive design
Databases	MySQL, PostgreSQL, SQLite; relational modeling, normalization, indexing, transactions
Tools & Data	Git, GitHub, Postman, pytest, NumPy, Pandas, Scikit-learn, debugging, unit testing

PROJECTS

SwiftCart — Quick-Commerce Web Application GitHub | Live Demo

Tech stack: *Python, Flask, PostgreSQL, Bootstrap, pytest*

- Built product catalog, search, cart, and checkout-simulation flows with user authentication and inventory checks.
- Implemented REST APIs with input validation and error handling; used database transactions for consistent stock updates.
- Wrote API tests with pytest to verify core cart and checkout behaviour.
- Built a responsive Bootstrap interface and an admin view for managing products and orders.

InsightML — Predictive Analytics Application GitHub | Live Demo

Tech stack: *Python, Pandas, NumPy, Scikit-learn, Flask*

- Cleaned and explored a public dataset, engineered features, and split data into training and test sets.
- Trained and compared classification models using precision, recall, and F1-score.
- Served predictions through a Flask API with input validation and displayed feature importance.
- Presented model results with charts in a simple web dashboard for non-technical users.

DevTrack — Issue Tracking Application GitHub | Live Demo

Tech stack: *Python, Flask, PostgreSQL, pytest*

- Designed a relational schema for projects, issues, assignments, and activity history with role-based access.
- Added search, filtering, and pagination to REST endpoints, with indexes on frequently queried columns.
- Covered key endpoints with pytest tests and documented the API.
- Added user login, issue status workflow (Open, In Progress, Closed), and comment threads on issues.

EDUCATION

B.Tech — Information Technology 2022 – 2026
Sri Venkateswara College of Engineering (SVCE), Tirupati | CGPA: 8.7/10

Intermediate — MPC 2020 – 2022
Narayana Junior College | CGPA: 8.5/10

CERTIFICATIONS

AWS Certified Cloud Practitioner — Amazon Web Services Oct 2025

Tech Mahindra Nandi Certification — Tech Mahindra

RELEVANT COURSEWORK

Data Structures, Algorithms, DBMS, OOP, Operating Systems, Computer Networks, Software Engineering, Machine Learning

ADDITIONAL INFORMATION

Strengths: Problem solving, quick learning, teamwork, clear communication, attention to detail
Languages: English (Professional), Telugu (Native), Hindi (Conversational)
